

EXTENDS FILTER LIFE • PROTECTS VACUUM MOTOR

# HAIRLESS

## PEAK AIRFLOW & TOP PERFORMANCE FOR SHOP VACUUMS

### IMPROVED OPERATION

HairLESS Filter is a revolutionary new filter designed to deflect most hair from attaching to existing shop vacuum filters, providing improved operation without compromising air flow to the vacuum, and allowing the equipment to work at maximum efficiency.

### EASILY CLEANED

Hair naturally falls off HairLESS Filters, and any remaining hair can be easily brushed off by hand. Dog dander can simply be wiped away with a damp cloth. Under normal use, HairLESS Filters have an estimated operating life of 3 to 4 years.

### REDUCES TIME

HairLESS Filters reduce the time required to keep filters clean. No changes are needed in the grooming routine and clean-up takes just minutes.

### EXTENDS EQUIPMENT LIFE

Since HairLESS Filters are installed over the vacuum's original filter and secured with an elastic band, the original filter requires less cleaning and does not need to be replaced as frequently. Equipment is able to operate at full air flow with less heat buildup, increasing the overall life of the equipment.

### PURCHASE FILTERS

To purchase a HairLESS Filter, or for more information, contact:  
**Ralph Gooch** at **248-842-0264**  
or **ralph.gooch@yahoo.com**.

*After one day of use, the HairLESS filter has minimal attached hair and is easily brushed off by hand. The vacuum's filter remains clean, even after three months.*
